Mk220T-AC SEAM SEALING MACHINE

The Mk220T-AC is designed to provide ease of operation , consistency and quality

The Differential Drive allows the machine to compensate for soft , stretch or difficult fabrics

The Control System has been upgraded yet retains the temperature and air supply feed back systems i.e. If the temperature is not within range the machine will not operate or if there is a failure in the air supply the heater will shut down and a warning will be placed on the HMI Display

The new HMI is a Touch Screen and this has made adjustments to settings easier , quicker and simpler .

The Lift Unit allows for better operator visibility and to give extra clearance for large items

Fitted as standard on the Mk220T- AC ~

Automatic scissors - to cut the tape at the end of a seam by means of an auxiliary palm switch

Lift Unit - The Lift Unit allows for better operator visibility and to give extra clearance for large items

Applications ~

Tents, balloons, car seat covers, filter bags...

Supply Requirements :

Electrical ~ 230 ± 10% Volt AC Single Phase 15 Amp at 50 Hertz

Pneumatic ~ 7 Bar at 100 Litres per minute
